SUMMARY

Data and AI professional with a background covering digital transformation, technology product building, and applying AI to real business problems. Gained practical experience in government and enterprise settings through EY, with CAPM® and CDMP certifications. Combines analytical thinking with hands-on knowledge of modern AI to deliver clear, structured work.

EDUCATION

Bachelor of Science in Software Engineering

Riyadh, Saudi Arabia | Sep 2021 – Aug 2026

Prince Sultan University

PROFESSIONAL EXPERIENCE

Data & AI Trainee – EY

Riyadh, Saudi Arabia | Jan 2026 – Aug 2026

Government Client – Confidential

- Evaluated data and AI readiness across the organization, identifying capability gaps and recommending targeted improvements
- Designed and developed frameworks to assess data governance maturity and measure progress against strategic objectives
- Supported the definition of a data and AI roadmap aligned with national digital transformation priorities

Telecommunications Client – stc

- Supported PMO activities within a large enterprise digital transformation program
- Tracked project progress, coordinated between workstreams, and maintained delivery documentation

AI Intern – Masterworks

Riyadh, Saudi Arabia | Jul 2024 – Aug 2024

- Contributed to AI model evaluation and testing across active initiatives
- Helped align technical outputs with real business requirements throughout the project lifecycle

Co-Founder & CEO – Nasq

Riyadh, Saudi Arabia | Jun 2024 – Jul 2025

- Built and launched a CRM platform for the salon industry from idea to live product
- Led product strategy, managed development cycles, and turned direct customer feedback into concrete improvements

Software Testing Intern – Riyadh Bank

Riyadh, Saudi Arabia | Aug 2023 – Sep 2023

- Tested core banking systems and identified functional defects before production deployment
- Documented findings and contributed to overall QA reporting across the engagement

Founder – Quizifyit

Riyadh, Saudi Arabia | Feb 2023 – Sep 2023

- Built an AI-powered quiz application that generates tailored questions from uploaded documents
- Iterated on product design based on user testing to improve overall experience and usability

CERTIFICATIONS

CAPM® – PMI (2025) · CDMP (2026) · NVIDIA Certified Associate – Generative AI & LLMs (2026) · Microsoft AI-900 (2025) · Accenture Strategy Virtual Experience (2025) · BCG Strategy Consulting Virtual Program (2025) · BCG X Data for Decision Makers (2025) · McKinsey Forward Program (2023)

PROJECTS

OMNR – AI-powered Arabic digital intelligence platform with live authentication, real data infrastructure, and an AI-driven analytics dashboard

Clinical AI Assistant – AI application that generates structured clinical radiology reports from scan images using multimodal large language models, with an integrated case discussion interface
